Example Text

- Among the rarest creatures in the mythical world, is the Minopillar. This being is the combination of a Minotaur and a caterpillar. Whilst you may think that it must be harmless because it is half caterpillar, you would be very much mistaken. This surprisingly aggressive creature will attack and eat humans if provoked. You should not be fooled by the miniscule eyes on either side of its head. In fact, this creature has shown to have extraspect abilities that are beyond anything discovered before.
